

COMPANY PROFILE 2026

Engineering, construction, logistics and force protection for
the most demanding clients in Iraq.

Building the future.
Restoring the past.

Twenty three years of engineering, construction, and
logistics across Iraq.

ERBIL | BAGHDAD
WWW.CHROO-GROUP.COM

■ Pipeline construction fleet, Kurdistan Region

WHO WE ARE

Deep roots. Stable future.

Chroo Group was founded in 2003 with a simple but important mission: to help rebuild Iraq after the war.

From the very beginning the company worked alongside Western contractors and engineers to adopt international construction standards, keeping health and safety at the forefront, maintaining strict quality control, and sharpening its project management discipline. That foundation earned the trust of prime international contractors, military forces, oil companies, and humanitarian organizations.

This dedication opened the door to new opportunities. Over time the group expanded into electrical works, oil and gas services, logistics, vehicle leasing, trading and distribution, security solutions, workforce services, catering, and agriculture. Today Chroo Group operates through fourteen specialized companies with an almost entirely locally hired workforce, headquartered in Erbil with field offices throughout Iraq.

■ Chroo site team, Erbil

■ Post war reconstruction, 2003

Building the future. Restoring the past.

Rebuilding what the war took, and building what comes next, from one accountable partner.

MISSION STATEMENT

Built for the most demanding sites in Iraq

We deliver engineering, construction, power, and life support inside the most demanding sites in Iraq, including active military installations, with an almost entirely local workforce working to international standards. Every project is completed on time, within budget, and safely, to the full satisfaction of the client.

CORE VALUES

Strategy

Every project planned from mobilization to handover before the first day on site.

Teamwork

Local professionals and international partners working as one team.

Trust

Long term relationships with clients who return project after project.

Growth

New sectors, companies, and capabilities added year on year since 2003.

Innovation

Investment in modern equipment, technology, and sustainable practices.

Safety

HSE management and HAZMAT trained staff on every site.

■ HSE managed foundation works, certified equipment and trained crews

One group. Four clusters. Fourteen companies.

Each company operates with its own team and management while drawing on the shared resources, equipment, and relationships of the group.

Construction and engineering

Design, build, and power for military, oil and gas, and industrial clients

Chroo Group

Parent company, established 2003. USACE MATOC and ISO certified.

CH Construction

Civil, mechanical, and electrical contracting to completion.

CH Oil and Gas

Pipeline and site services for operators and contractors.

Nimu Tech

Oil and gas services in central and southern Iraq.

Studio Plus

Design and fabrication of steel and containerized units.

Logistics and trading

Warehousing, transport, equipment, and international brands

CH Logistics

Warehousing, transport, and customs across Iraq.

CH Business Park

350,000 m² compound on Gazna Road, Erbil.

Chroo General Trading

Schneider Electric, Dirickx, and A-1 Fence anti drone systems.

Ability Cars

Vehicle and equipment rental, over 500 units.

Services and hospitality

Workforce, catering, and hospitality for camps and the city

Right Jobs

Recruitment, payroll, and workforce training.

Tablea Plus

Restaurant, industrial catering, and events for 400 guests.

Areza Plaza Motel

Hospitality property in Shaqlawa, Erbil Province.

Agriculture

Sustainable farming and organic produce in the northern region

CH Pickax

Farming on over 12 million m² of land.

Tablea Green Farm

Organic farm to table project with Dutch partners.

SERVICES AND SOLUTIONS

Twelve service lines. One accountable partner.

Delivered by dedicated companies and coordinated through the group, so clients deal with one partner from mobilization to handover.

 06 Construction Civil, structural, steel, camps, and finishing works from award to completion.	 13 Studio Plus Architectural and interior design with steel and containerized fabrication.	 07 Electrical and power Power plants, distribution, Schneider panel building, and solar projects.	 08 Oil and gas Pipelines, EPC, commissioning, maintenance, and manpower for operators.

CONSTRUCTION

From contract award to completion

Since 2003, Chroo Construction has delivered construction and engineering projects across Iraq to international standards of quality and professionalism. Our expertise spans full project management, architectural and engineering design, surveying with modern equipment, HSE management, and QA and QC, with more than 640 projects completed to date.

■ Aircraft hangar, Erbil airbase

■ Steel frame erection, Erbil

■ Reinforced concrete substructure works

CONSTRUCTION WORKS

- **Road works** construction and maintenance
- **Ground work** excavation and foundations
- **Concrete work** formwork and reinforcement
- **Camp construction** worker and site camps
- **Structural work** steel and concrete frames
- **Steel fabrication** custom assemblies

MORE WORKS

- **Electrical work** wiring and distribution
- **Plumbing and water** supply and drainage
- **HVAC** heating, ventilation, cooling
- **Finishing** painting, flooring, cladding
- **Procurement** materials supply
- **Airfield works** aprons, roads, and hangars

ELECTRICAL AND POWER

Power generation, distribution and solar

Chroo Group delivers complete electrical and power solutions, from full facility wiring through the design and construction of centralized power plants. Our teams have built and commissioned power plants for military airbases and industrial sites, integrating backup generation with the national grid through automatic crossover and transfer systems for uninterrupted supply.

As the official distributor and authorized panel builder for Schneider Electric in Iraq, we combine world class equipment with local engineering capability, and we are expanding into large scale solar projects for agricultural, industrial, and remote sites.

SERVICES

- Centralized power plants and generator farms
- Transformer and distribution systems with automatic crossover
- Automatic transfer switches and backup integration
- Low and medium voltage installations
- Panel board design and production

SOLAR AND SUPPORT

- Large scale solar plants from design to commissioning
- Solar powered irrigation and off grid systems
- Substation works, cabling, earthing, and lighting
- Testing, commissioning, and long term O&M

Official distributor and authorized panel builder in Iraq

■ Containerized generator plant with cable trays, military base installation

■ Transformer room and switchgear

■ Utility scale solar plant under construction

■ Pipeline lowering in with sidebooms, Kurdistan Region

■ Right of way and stringing

■ Trench works and bedding

OIL AND GAS

Trusted by international oil companies

With more than two decades in the sector, Chroo Group delivers a wide range of oil and gas services for international operators and their contractors. We combine deep local experience and strong relationships with international management practices and global standards, executing projects of any scale with quality, efficiency, and transparency. Nimu Tech extends the same services to central and southern Iraq.

SERVICES

- Pipeline construction, maintenance, and inspection
- Groundwork and civil works for camps and facilities
- EPC project execution to international standards
- Installation, start up, and commissioning
- Overhaul, upgrading, and retrofitting

SUPPORT

- Maintenance, repair, and operation support
- Welding and fabrication works
- Skilled manpower across disciplines
- Preservation, storage, and inventory management
- Field service under structured agreements

LOGISTICS AND BUSINESS PARK

The largest Western standard compound in the KRG

We deliver comprehensive transportation and logistics services across the region with certified equipment operated by experienced drivers who strictly adhere to international HSE procedures.

Chroo Business Park in Gazna covers 350,000 square meters, with covered warehouse buildings built to international standards and expansive open storage areas designed for maximum security and accessibility.

COMPOUND SERVICES

- **Access and security** manned Gazna Road gate at all times with secure perimeter fencing and lighting
- **Power and utilities** continuous mains electricity with backup generation, water supply, and drainage maintained to the site plan
- **Maintenance workshop** on site servicing of heavy equipment, vehicles, and generators by Chroo technicians
- **Handling services** forklifts, cranes, and loaders available for tenant cargo and container moves
- **Transport and customs** haulage, customs clearance, and documentation arranged from the compound
- **Compliance** all storage and operating permits secured and maintained on behalf of tenants

TRADING AND DISTRIBUTORSHIPS

International brands, local delivery

Chroo General Trading sources high quality materials and equipment that are often only available outside Iraq. Through a vendor network across Europe, Türkiye, the Gulf, and Asia, we handle procurement, shipping, customs clearance, and delivery to site, so clients receive certified products with local engineering, installation, and after sales support from one accountable partner.

■ Import and distribution across Iraq

Official distributor and authorized panel builder in Iraq. Energy management, automation, and low and medium voltage equipment.

Official distributor in Iraq. Earth filled defensive barriers, perimeter fencing, and force protection systems made in the UK.

Official distributor for the Kurdistan Region. Anti drone fencing, overhead drone protection canopies, and site security systems.

WHAT WE SOURCE

- Electrical switchgear, panels, and automation
- Security and anti drone fencing, gates, and barrier systems
- Construction and structural steel materials
- Generators and power supply units
- Sea containers and prefabricated units
- Vehicles, plant, and spare parts

HOW WE DELIVER

- **Specification** technical review against client requirements
- **Sourcing** quotations from approved manufacturers
- **Shipping** sea, air, and road freight to Iraq
- **Customs** clearance and documentation handled in house
- **Delivery** to site from the Gazna business park
- **Support** installation, warranty, and spare parts

23

years of import experience in Iraq

SECURITY SOLUTIONS

Force protection for critical sites

Chroo Group provides integrated physical security and force protection for critical infrastructure, oil and gas facilities, military installations, and diplomatic sites across Iraq. Drawing on more than two decades supporting international militaries and oil companies, we design, supply, and install complete protective systems tailored to each threat environment.

DIRICKX SYSTEMS

As the official distributor in Iraq, we supply earth filled defensive barriers manufactured in Leeds, UK. The welded mesh and geotextile units ship flat, deploy rapidly, and are filled on site with local material using standard plant to form blast walls, perimeter defenses, bunkers, guard positions, and overhead protection.

Made in the UK. Official distributor in Iraq.

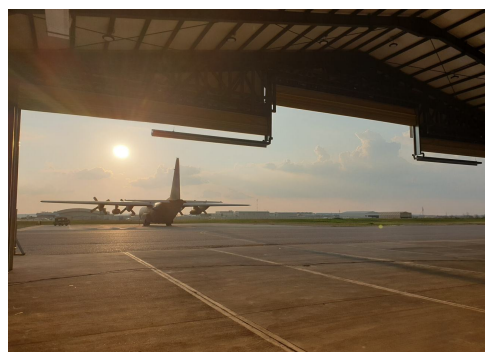

SERVICES

- **Site assessments**
Threat analysis and protective design for facilities and camps
- **Perimeter protection**
Fencing, gates, and certified barrier systems
- **Defensive barriers**
Earth filled walls for blast and ballistic mitigation
- **Anti drone protection**
Barrier systems and overhead protection canopies
- **Hardened structures**
Bunkers, guard huts, towers, and ballistic shelters
- **Vehicle mitigation**
Entry control points and barriers to international standards
- **Electronic security**
Access control, monitoring, and surveillance integration
- **Installation and maintenance**
Commissioning and lifecycle support by Chroo teams

Demonstration site at the Gazna business park lets clients inspect barrier configurations before deployment.

■ Hardened shelters and defensive barriers, military base

■ Aircraft hangar interior, Erbil airbase

■ Camp unit installation by crane

MILITARY AND DEFENSE

Twenty three years beside the military

Chroo Group maintains strong ties with the military sector and brings 23 years of experience working with military entities in Iraq. Since 2003 we have grown into one of the most trusted local partners of the United States military and NATO aligned forces, and we are one of only five companies selected for MATOC under the United States Army Corps of Engineers.

Two decades in the field have also built direct relationships with foreign defense suppliers. We represent them to buyers in Iraq, including government entities and oil and gas operators, handling registration, tendering, and delivery.

TRACK RECORD

- Turnkey camps for the US, Canadian, Finnish, Belgian, and Italian forces
- Airfield works and hangar construction and maintenance
- Fences, gates, and force protection
- Life support, catering, and camp operation and maintenance

DEFENSE BROKERAGE

- Established relationships with foreign defense suppliers
- Introductions to Iraqi government and oil and gas clients
- Local representation, registration, and tender support
- Contract facilitation from first meeting to delivery

STUDIO PLUS +

Design, engineering and fabrication under one roof

Studio Plus is the architectural and interior design company of the group. In collaboration with the Chroo fabrication workshop it delivers end to end solutions: containerized housing units, training towers, trailers, hangars, and steel structures, together with cladding, carpentry, and MEP services benchmarked against international standards.

DESIGN

- Architectural and structural design
- Interior design and fit out
- Complete engineering plans
- Cladding, carpentry, and MEP

FABRICATION

- Containerized housing and office units
- Training towers and trailers
- Hangars and steel structures
- One stop design and build

■ Chroo fabrication workshop, containerized unit production

■ Finished containerized units on site

■ Steel mezzanine offices inside a warehouse

Fleet rental for teams that cannot stand still

Ability Cars was the first 100 percent locally owned rental company in Iraq. Since 2003 it has supplied fleets to foreign military units, defense contractors, NGOs, oil and gas operators, and corporate clients, with long standing support at Erbil Airbase. The fleet spans six classes, from sedans and compact SUVs to full size 7 seat SUVs, armored vehicles, double cab pickups, 12 seat vans, and buses.

SERVICES

- Short and long term rental daily, monthly, and multi year leasing
- Armored vehicles B6 protected SUVs for high risk movements
- Drivers and operators vetted local drivers on request
- Airport and base delivery handover at Erbil International Airport or on site
- Fleet management GPS tracking, reporting, and journey management
- Maintenance and service at our own workshop with courtesy vehicles
- Insurance and registration handled for every vehicle
- Heavy equipment cranes, loaders, trucks, and generators via the group

Recruitment, payroll and training

Right Jobs is a workforce development company operating across Iraq and the MENA region. It specializes in payroll services, ensuring accurate, timely, and fully compliant management of salaries, benefits, and related HR processes for companies of all sizes, so organizations can focus on growth while the administrative and legal complexity is handled for them.

WHAT WE DELIVER

- **Payroll management** for local and international employers, fully compliant with Iraqi regulations
- **Recruitment** as a trusted channel connecting employers with qualified candidates across industries
- **Training programs** with fully funded internships, professional courses, and coaching tailored to market demand
- **Manpower supply** of skilled and experienced personnel for oil and gas, construction, and government clients
- **Localization** supporting the workforce plans of government and international operators

■ Workforce development across Iraq and the MENA region

PICKAX AND AGRICULTURE

Sustainable farming at scale

Chroo entered agriculture with the establishment of Pickax, a dedicated farming company that has secured over 12 million square meters of land across the northern region of the country, an area renowned for its optimal growing conditions.

Pickax works to elevate irrigation practices, has replaced chemical fertilizers with organic alternatives across all of its farms with proven results, and is integrating solar powered irrigation to lower costs and emissions. Tablea Green Farm delivers organic produce farm to table under the same agricultural cluster.

- Over 12 million m² in Qushtapa, Jadeedah, Makhmoor, and Seabran
- Olive groves, alfalfa, forage, and field crops
- Organic fertilization across all farms
- Modern irrigation and solar powered pumping
- Trial fields with Dutch agricultural partners

CATERING, EVENTS AND HOSPITALITY

One of the finest restaurants in Iraq

Tablea Plus is among the highest regarded fine dining restaurants in Iraq. Set near Erbil International Airport and the international military bases, it seats 300 indoors with an outdoor terrace for more than 400, and is known for a refined blend of international and traditional cooking, attentive service, and a setting that carries both quiet luxury and local character.

The same kitchen and the same standards carry the wider business. Tablea Plus delivers industrial catering and life support to camps, bases, and remote sites, Chroo Cater and Event runs a dedicated hall for up to 400 guests, and Areza Plaza Motel in Shaqlawa extends the portfolio into the mountain resort town.

WHAT WE OFFER

- **Fine dining** 300 indoor seats and an outdoor terrace for more than 400 at the Tablea Plus restaurant
- **Private dining and functions** for corporate guests, delegations, and visiting clients
- **Events** weddings, corporate gatherings, and social functions up to 400 guests
- **Industrial catering** and life support for camps, bases, and remote sites
- **Camp messing** managed dining facilities with local and international menus
- **Farm to table** produce supplied from Tablea Green Farm

WHY CHROO

Competitive advantages in Iraq

Financial stability, in house resources, and relationships built over 23 years let us mobilize when others are still planning.

01

Financial stability

Bulk procurement of materials up front, never delaying a project for lack of cash flow. One of the oldest and most established contracting companies in the country.

MATERIALS BOUGHT UP FRONT

02

Ready to go today

Our own equipment, from scaffolding to automated metal structure forming machines, and a fleet of more than 500 units. No waiting on purchase orders or subcontractors.

PLANT AND FLEET OWNED OUTRIGHT

03

24 hour mobilization

Response and mobilization within 24 hours of a client request, and delivery of supplies and equipment from stock within the same window.

TEAMS ON SITE INSIDE A DAY

04

USACE MATOC status

One of only five companies selected for Multi Award Task Order Contracts under the United States Army Corps of Engineers, working to US Federal Acquisition Regulations.

ONE OF FIVE SELECTED

05

Local knowledge and reach

Relationships with tribal leaders, government officials, ministries, and vendors, and the ability to establish camps, mobilize personnel, and move materials throughout Iraq.

ACCESS ACROSS THE COUNTRY

06

Exclusive distributorships

Sole distributor and panel builder for Schneider Electric and sole distributor for Dirickx Security Systems in Iraq, and for A-1 Fence anti drone fencing and overhead drone protection in the Kurdistan Region.
